

Fact Sheet

First Quarter, 2023

Emerging Markets Strategy

Boston Common's Emerging Markets strategy invests in a diversified portfolio of high-quality companies with sound governance and sustainable business models selling into growing end markets.

Firm Overview

Boston Common Asset Management (BCAM) is an independent, women-led, and majority women- and employee-owned firm with a dual mandate to generate competitive returns and positive social & environmental impacts. An active, ESG-integrated, global equity investment manager and leader in shareowner engagement since 2003, BCAM challenges companies across industries to devote resources and innovation toward social equity and earth renewal. BCAM is headquartered in Boston, with offices in San Francisco. The company's investment strategies totaled \$5.0 billion in assets as of March 31, 2023.

ESG-Integrated Investment Team

Boston Common's seasoned ESG-integrated Investment team seeks innovative companies offering attractive, risk-adjusted, long-term returns. The team uses an active shareowner engagement approach that targets improvements in corporate policies, processes, and products.

*Represents the absolute percentage of Class A employee owners, which account for 85% total ownership of the firm. Class B shares are held by a single, private outside entity and represent 15% ownership of the firm, as of 2/1/2021. Composite returns are presented in U.S. dollars, net of transaction costs, management fees and withholding taxes, with interest and dividends accrued. Returns for periods greater than one year are annualized.

Portfolio Carbon Footprint²

Boston Common is a member of the Partnership for Carbon Accounting Financials (PCAF), a global, industry-led initiative to measure and disclose portfolio GHG emissions. All strategies are aligned within the range of a 1.5 – 2 degrees scenario analysis through 2050.

Company Engagement Spotlight

SK Telecom and Tencent adopted ethical AI policies in 2022.

¹ The Sustainable Development Goals were adopted by the Member States of the United Nations by resolution A/RES/70/1 of the General Assembly of 25 September 2015. 2ISS Climate Impact Assessment defines portfolio the carbon footprint using the position ownership ratio, which is the aggregated weight per position in the portfolio calculated by aggregated position value divided by the total analysis value. The resulting aggregated position value is then divided by the Market Cap or AEV (Adjusted Enterprise Value, defined as "total debt plus market capitalization"). Data Source: ISS. ISS is an independent company owned by entities affiliated with Genstar Capital ("Genstar"). The information in this document should not be considered a recommendation to buy or sell any security. The MSCI Emerging Markets (or "EM") Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market performance in the global emerging markets. The EM Index covers many emerging market country indices. Designation as an emerging market is determined by several factors. MSCI evaluates factors such as gross national income per capita; market depth and liquidity; local government regulations; perceived investment risk; foreign ownership limits and capital controls; and the general perception by the investment community when determining an "emerging" classification of a market. Indices are unmanaged and do not incur management fees, transaction costs, or other expenses associated with separately managed accounts. Boston Common claims compliance with Global Investment Performance Standards (GIPS®). For a full listing of Boston Common's composites and to request a GIPS® Compliant presentation, please call the Compliance Department. © 2021.
