Emerging Markets Equity Fact Sheet

First Quarter, 2022

For professional investors only

Strategy Overview

Boston Common's Emerging Markets strategy seeks long-term capital appreciation by investing in a diversified portfolio of EM stocks that appear undervalued relative to their long-term fundamental outlook. We look for high-quality franchises with sound governance and sustainable business models that are selling into growing end markets. We have a 3-5 year time horizon with low turnover. The portfolio is benchmarked to the MSCI Emerging Markets.

Firm Overview

Boston Common is a boutique, global equity manager dedicated to integrated ESG impact investing since our founding in 2003. Women-led and majority women- and employee-owned, we integrate disciplined, financial research with environmental, social, and governance (ESG) analysis. Using our voice as active shareowners, we encourage companies and stakeholders to meet the urgent, systemic challenges faced by people & planet such as climate change, and racial & gender inequity. Our 40 employees are responsible for the management of approximately $5.5 billion in assets as of March 31, 2022.

Integrated ESG Investment Process

We deploy rigorous ESG and financial analysis to identify innovative companies that offer attractive risk-adjusted long-term investment returns and provide products and/or services that positively impact society. We believe that companies addressing global sustainability challenges & opportunities will experience larger than expected demand for their products & services over the long term, thus building competitive advantages. Believing that these opportunities are dynamic and are not fully reflected in valuation, Boston Common's experienced and independent integrated ESG Investment team seeks responsible, impact generating investment opportunities and uses active shareowner engagement to catalyze improvements across company policies, processes, and products.

Integrated ESG Investment Team

Our diverse, 19-person integrated ESG investment team is composed of seasoned global sector analysts and a dedicated ESG research team with specific domain expertise. Our team has an average of 21 years of investment experience with 12 CFA Charterholders firm-wide.

**ISS Climate Impact Assessment defines portfolio the carbon footprint using the position ownership ratio, which is the aggregated weight per position in the portfolio calculated by aggregated position value divided by the total analysis value. The resulting aggregated position value is then divided by the Market Cap or AEV (Adjusted Enterprise Value, defined as "total debt plus market capitalization). A portfolio's Carbon Intensity is achieved by calculating the carbon intensity (Scope 1 + 2 Emissions / $M Sales) for each portfolio company and calculating the weighted average by portfolio weight. All data as of reporting date: December 31, 2020. ISS is an independent company owned by entities affiliated with Genstar Capital ("Genstar"). The information in this document should not be considered a recommendation to buy or sell any security. The MSCI Emerging Markets (or "EM") Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market performance in the global emerging markets. The EM Index covers many emerging market country indices. Designation as an emerging market is determined by several factors. MSCI evaluates factors such as gross national income per capita; market depth and liquidity; local government regulations; perceived investment risk; foreign ownership limits and capital controls; and the general perception by the investment community when determining an "emerging" classification of a market. Indices are unmanaged and do not incur management fees, transaction costs, or other expenses associated with separately managed accounts.
