Quarterly Profile

Third Quarter, 2026

Boston Common Asset Management

Catholic International Equity

The Catholic International Equity Portfolio is fully invested, diversified and built through high-conviction, research-driven analysis. We invest in high-quality companies with durable business models and sound governance, combining fundamental and sustainability-informed research with active management and proactive stewardship. The strategy seeks to preserve capital in down markets and deliver competitive performance over a full cycle. The Catholic International portfolio's investment guidelines align with the US Conference of Catholic Bishops (USCCB) guidance.

Firm Overview

Boston Common Asset Management (BCAM) is an independent global equity investment firm focused on delivering competitive long-term returns across the U.S., developed international, and emerging markets. Since 2003, BCAM has combined proprietary research, disciplined portfolio construction, and active ownership with deep expertise in translating investor objectives and preferences into customized, values-aligned portfolios. The firm offers high-conviction fundamental equity strategies, custom direct indexation, and systematic, research-driven portfolios powered by its proprietary AMRIS platform. Headquartered in Boston, BCAM managed approximately $4.53 billion in assets as of September 30, 2026.

Fundamental Equity Investment Approach

BCAM focuses on identifying long-term opportunities in companies with strong business models, capable management teams, and durable growth prospects, supported by consistent valuation discipline. Portfolios are constructed to balance quality, risk, and diversification across sectors and regions. A collaborative process brings together portfolio managers, analysts, and sustainability specialists to develop differentiated views, while ongoing stewardship and direct company dialogue help reinforce conviction over time.

Portfolio Management Team

Matt Zalosh, CFA
- 30 years experience
- With BCAM since 2004

Praveen Abichandani, CFA
- 34 years experience
- With BCAM since 2005

Supported by:
- Full team of fundamental research analysts.
- Stewardship + sustainability research team.

Opportunity

Resilient earnings are supporting international equity opportunities despite geopolitical and fiscal risks. Europe's shift toward renewables and continued infrastructure investment are strengthening resilience. In Japan, governance reform, recovering pricing power, and policy normalization support a constructive outlook. Across markets, AI infrastructure, electrification, and grid investment offer structural growth opportunities, while higher interest rates support bank profitability. We favor global leaders with durable competitive advantages, balancing these exposures with defensive healthcare and communication services companies.

Composite returns are presented in U.S. dollars, net of transaction costs, management fees and withholding taxes, with interest and dividends accrued. Returns for periods greater than one year are annualized.

Portfolio Review

Boston Common's Catholic International strategy returned +1.1%, before fees, outperforming the Index. Strong stock selection in Financials was the leading contributor, as good execution and rising interest rates lifted earnings expectations for our bank holdings. Singapore's OCBC, Japan's Mitsubishi UFJ, and European lenders Standard Chartered, ING, BBVA, and Intesa Sanpaolo all reported record results and raised guidance or shareholder distributions. Technology also added value: our semiconductor holdings held up better than the Index's during a sell-off in chip stocks, and German software company SAP surged on accelerating cloud growth. In Consumer Discretionary, Sony rallied on record results in its smartphone image-sensor business, and our underweight in luxury goods helped amidst weaker consumer demand. Europe ex-UK was our strongest region, including Irish insulation maker Kingspan, Deutsche Telekom, and Swiss hearing aid manufacturer Sonova. Semiconductor test equipment maker Advantest was another key contributor.

Industrials was the largest detractor, primarily due to our overweight in electrical equipment. Chinese battery maker CATL fell as domestic automakers diversified their suppliers, while Italian cable manufacturer Prysmian and Mitsubishi Electric declined alongside data center-related stocks. New Danish logistics holding DSV dropped due to merger integration concerns, while Japanese water treatment company Kurita lagged. Consumer Staples also detracted, as Nestle and Ahold Delhaize declined. French water utility Veolia was caught in the sell-off of French assets. Our zero weight in Energy, the Index's best-performing sector, also weighed on relative results. Japan was our weakest region, as stock selection detracted, driven by our sector mix and by drugstore operator Sugi and electronic components maker TDK. Emerging Markets holdings also weighed on results.

Portfolio Trades

Among our transactions this quarter, we purchased Danish logistics company DSV, the world's largest third-party freight forwarder. Increasingly complex supply chains favor scaled operators, and DSV's acquisition of DB Schenker should accelerate growth and boost margins. The company also helps customers reduce transport emissions through route optimization.

We also bought Swiss flavors and fragrances leader Givaudan. With roughly a quarter of the global market, Givaudan's high-value ingredients are costly for customers to reformulate, supporting proven pricing power and stable profitability. Its innovation in natural colors and wellness ingredients aligns with demand for healthier products, and the stock trades near historically low valuations.

Lastly, we purchased Japanese agricultural and construction equipment manufacturer Kubota. A leader in compact tractors and mini excavators, the company also provides water infrastructure solutions. Management is prioritizing profitability over volume and targets meaningful margin expansion, while the stock trades at a decade-low relative valuation.

We sold ASSA ABLOY given weak end-markets and disappointing execution. We also exited DSM-Firmenich in favor of Givaudan. Finally, we sold Mercedes-Benz due to structural challenges and Jeronimo Martins amid challenging grocery market dynamics.

The Morgan Stanley Capital International (Net) Europe, Australasia and Far East Index is a free-float adjusted market capitalization index that is designed to measure equity performance in developed markets as determined by MSCI, excluding the U.S. and Canada. The Index's performance results are presented net of estimated foreign withholding taxes on dividends, interest and capital gains. The withholding tax rates are applicable to Luxembourg holding companies. The Index is unmanaged and does not incur management fees, transaction costs, or other expenses. The composition of this portfolio is different from the composition of the Index because of differences in sector and industry exposure, risk, volatility, and holdings. This product invests in foreign securities, which are subject to special currency, political and economic risks The composition of our composite is different from the composition of indices because of differences in sector and industry exposure, risk, volatility and holdings.

Outlook & Positioning

European and Japanese earnings growth should remain healthy, assuming geopolitical crises do not escalate further. Europe's accelerating shift to renewables (nearly 50% of power generation) and electric vehicles (over 20% of sales) should add resilience. Bond market pressure and politics are a growing risk to fiscal spending, especially in France, but European investment in infrastructure and defense will likely persist. In Japan, governance reform, recovering pricing power, and policy normalization support a constructive outlook. Elsewhere in Asia Pacific, economic dynamism, rising regional trade and wealth creation, and stable institutions offer attractive diversification opportunities.

Our portfolios emphasize global leaders in structurally attractive markets, notably power equipment and semiconductor companies benefiting from AI infrastructure, electrification, and grid investment. Financials remain our largest sector, led by banks whose profits are benefiting from higher interest rates. We balance these cyclical exposures with overweights in defensive Communication Services and Consumer Staples and continue to favor companies leading the transition to more sustainable economies.

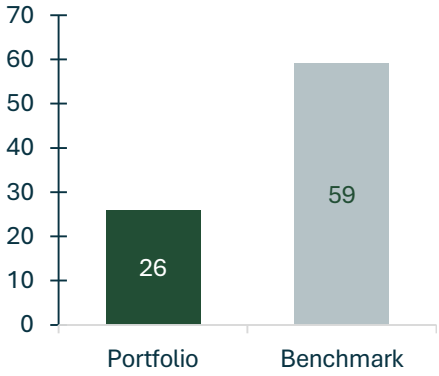
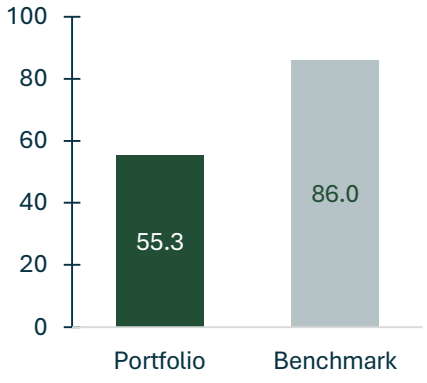
Portfolio Carbon Footprint [1]

Emissions Exposure (Scope 1&2) (tCO_2e)



Carbon Intensity* (tCO_2e/Mio USD Revenue)



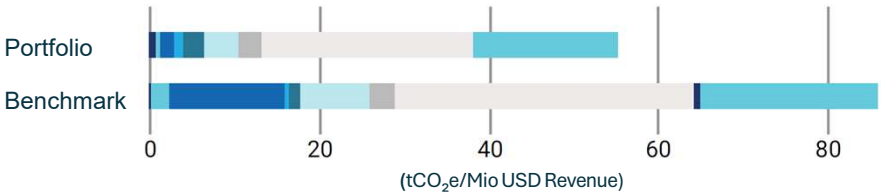
Catholic International Equity vs MSCI EAFE

55.9% fewer emissions

35.7% less Carbon Intensive*

*Weighted Average

Weighted Avg Greenhouse Gas Intensity by Sector



[1]Data Source: ISS ESG Climate Impact Assessment. *ISS Climate Impact Assessment defines portfolio the carbon footprint using the position ownership ratio, which is the aggregated weight per position in the portfolio calculated by aggregated position value divided by the total analysis value. The resulting aggregated position value is then divided by the Market Cap or AEV (Adjusted Enterprise Value, defined as "total debt plus market capitalization). A portfolio's Carbon Intensity is achieved by calculating the carbon intensity (Scope 1 + 2 Emissions / $M Sales) for each portfolio company and calculating the weighted average by portfolio weight—all data as of reporting date: September 30, 2026. ISS is an independent company owned by entities affiliated with Genstar Capital ("Genstar"). The information in this document should not be considered a recommendation to buy or sell any security.
